

MODULAR ARCH SYSTEM
A proprietary design that utilizes segmentation to allow the athlete to significantly improve their range of motion without sacrificing player protection.

Z-FIT BELTING SYSTEM
Attachment system using high-strength nylon clips to increase the ease of putting on and securing a shoulder pad.

ENERGY MANAGEMENT BODIES
Strategic combination of energy management materials inside the shoulder pad bodies absorbs impact energy and retains position and purpose during play.

SHOULDER PAD ACCESSORIES

WARNING: NO SHOULDER PAD CAN PREVENT SERIOUS OR FATAL INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL. Any modification or alteration of this product could reduce its protective capacity. Football activities may result in heat related illness. Symptoms may include: dizziness, cramping, heavy sweating, vomiting, confusion, or elevated temperature. If you have symptoms immediately stop playing and report them to your coach, athletic trainer, and parents. Do not return to activity until all symptoms are gone and you have received **MEDICAL CLEARANCE.**
